

Freiburger Plea

**To all Free Democrats, FDP Members,
MdBs in the Bundestag,
MdLs in the Landtage,
MdEPs in the European Parliament:**

The Greek People suffer and the Greek State maneuvers.

The continuously new measures for years and years toward a temporary relief of the insolvent Greek State from its financial debt load, including the package of measures decided in great hectic on 26th 11. 2012 in Brussels, will lead at best to a delay, however not to significant improvements for the Greek People!

The recently decided debt-buyback operation, the success of which by the 12th 12. 2012 represents the absolute precondition for a further participation of the IMF in aids for Greece must be judged with large scepticism.

Honorable Free Democrats, FDP Members of Parliament, have the courage to tell the German Citizens the truth crystal clear:

1-The Greek State is de facto insolvent!

2-The Greek People can count on help for self-help from Germany!

3-A major waiver by all creditors of the Greek State, which is overloaded with state debts is inevitable!

4-The help from Germany can and must be appropriated for the construction and recovery of a competitive economy and of sustainable and efficient state institutions!

5-Following a 'hair cut', the creation of legal-, organisational-, and infrastructural conditions must be imposed on the Greek State that are necessary for private and public investors from Germany and other Countries for a participation in the construction of the Greek economy!

6-Greece as a Partner State of the EU must be willing to learn to adjust its state budget and standard of living to its national ability to perform and to its international competitiveness, since a permanent transfer of German public funds to the Greek State can not be expected!

**For a Europe as a Federation of Sovereign States
based on the solid foundation of cultural diversity, contractual fidelity and competition,
however not at the price of inflation and new debt by ESM and ECB.**
